

American Equity Now Offering Volatility Control Index

Highlights:

■ Well Diversified:

Based on the S&P 500[®] Dividend Aristocrats[®] Daily Risk Control 5% Index – companies that have seen 25 consecutive years of dividend increase.

■ Includes Dividends Unlike the S&P 500:

Dividends comprised more than 1/3 of monthly total return of S&P 500 Index since 1926.*

■ Transparency:

Daily valuation information on S&P Dow Jones Indices website. For updates, visit us.spindices.com and search for ticker: SPXD5UN.

■ Non Proprietary:

Cannot be manipulated by carrier or manufacturer.

All with the Power of Annual Reset.

American Equity's Volatility Control Index offers safety, stability and control with higher payout potential.

We are living longer and enjoying higher standards of life. As more and more individuals eye their retirement, they look for more ways to gain access to money while they build toward their financial goals. Our new Volatility Control Index affords policyholders the safety of their premium as well as peace of mind.

Volatility Control Index

How it Works:

The Volatility Control Index is dynamically adjusted across two components: equity and cash.

When volatility increases, the weight increases in the cash component. When volatility decreases, the weight increases in the equity component. After the credit calculation is complete and asset fee is applied, the return on this index is guaranteed to never be less than zero.

The S&P 500® Dividend Aristocrats® Daily Risk Control 5% Index offers increased stability and control based on companies with 25 consecutive years of positive dividend returns.

The one who works for you.
